September 28, 2004

Sir:

Applicant(s) attach(es) to the present paper a "Sequence Listing", as required by Rule 821(c), and a copy of the "Sequence Listing" in computer readable form, as required by Rule 821(e).

Applicant(s) hereby state(s) that the content of the attached paper and computer readable copy of the Sequence Listing are the same.

Respectfully submitted,

YOUNG & THOMPSON

Re: **PCT/AT03/00065//JSW-Research Forschungslabor [Research  
Laboratory] GMBH**  
**Protocol of Nucleotide Sequences and Amino Acid Sequences**

With reference to the communication dated 5/16/2003, the protocol of the nucleotide sequences and/or the amino acid sequences corresponding to the WIPO Standard ST 25 shall be sent to the applicant later in connection with PCT/AT03/00065. In this connection, it is hereby declared that this sequence protocol according to the attachments does not exceed the disclosure content of PCT/AT03/00065. Rather, the amino acids defined on page 14 of the description in PCT/AT03/00065 in accordance with the WIPO Standards were transferred to the corresponding compounds according to claim 1. A noteworthy aspect of this transfer is that at the time of the application, an obvious error occurred with respect to the designation E for D- or L-gentaminic acid as well as to the designation F for D- or L-phenyl acid. In this case, this is an error that is obvious to one skilled in the art at the time of the application, which is corrected to the extent that the D- or L-gentaminic acid corresponds to a D- or L-glutaminic acid, and the D- or L-phenyl acid corresponds to the D- or L-phenylalanine.

10/509095

DT04 Rec'd PCI/PTO 28 SEP 2004

In addition, [REDACTED] explained that the sequence protocol that was sent in by mail in computer-readable form and stored on a disk corresponds to the sequence protocol that is enclosed according to the attachments.
